DETAILED ACTION

Allowable Subject Matter

1. Claims 1-6 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art does not teach or fairly suggest an imaging apparatus comprising a solid-state imaging element with a large number of pixel cells that include a main photosensitive site and a dependent photosensitive site, an imaging signal acquirement controlling device, a main black level correction value determining device which determines a black level correction value from the main photosensitive pixel site, a dependent black level correction value determining device which determines a dependent photosensitive pixel black level correction value by calculation from the main photosensitive pixel black level correction value and a black level correcting device which performs black level correction using the main black level correction value for main photosensitive pixel sites and the dependent black level correction value for dependent photosensitive pixel sites as claimed. While the prior art teaches solid-state imaging elements including high sensitivity areas and low sensitivity areas (see for example, Harada, JP 09-204589; Sugimoto, 2004/0145672; Nakamura, 2004/0096124) and correction of black levels based on calculated values (see for example Prentice et al., 7,064,785; Kelly et al., 2004/0051796, MacLean, 6,144,408; Jacobs, 7,102,672; Ikeda, 5,801,773) are known in the prior art, the specific combination claimed is not taught or suggested.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
